Edge

A table and soft desking system designed by PearsonLloyd

Edge is a refined and elegant table and soft desking system.

The system can cater for individual café and meeting tables up to cable managed group working conditions and boardroom tables.

The tables come in flat-pack form and are easy to assemble. The table surface is offered in laminate, veneer and glass, and can be specified either set down and within the aluminium frame or on top with an exposed edge.

Edge, laminate top within aluminium frame

Luke Pearson and Tom Lloyd

The basic version of the table is supplied with an integral intelligent frame that is set beneath the table surface.

This frame allows every table to be retro fitted with a set of accessories, from a cargo net to deal with cable management and under-mount CPU cradle to top-up screens.

For high-wear contract environments it is recommended that glass be set down inside the frame.

The cargo net is easily installed via a simple spring-loaded clip that slots into the profile beneath every table. The mesh net has a number of holes that allow a sock to be positioned to take cables and data to the floor. A simple zip allows easy access.

A series of screen options allow various functions to be offered either to individuals or to groups.

Single screens and the shared screens used to divide two desks for additional privacy are available in magnetic marker board and a pinable fabric surface.

Pearson/Lloyd

Pearson/Lloyd is a London based design Studio working across a wide variety of disciplines including furniture, product, transport and the public realm. Tom Lloyd and Luke Pearson met while studying at the Royal College of Art in the early 1990's. The partnership was founded in 1997 out of a shared desire to bridge the often disparate cultures of furniture and product design.

Key recent projects include Virgin Atlantic Airway's new Upper Class Suite, a range of walk-in showers for Ideal Standard, a new street lighting system for Artemide and numerous furniture projects for Tacchini, Allermuir, Senator and Walter Knoll.
